Dario,

The new Grand Rapids, MI Press facility is simply breathtaking. I had the opportunity to tour the new plant yesterday. To say it's beautiful is an understatement. The attention to every detail down to the slate curved counter at the reception desk and the special artistic touches adding vertical glass on the exterior. The layout organizing the production flow will benefit the employees in Grand Rapids immensely.

I am so proud that our hometown paper was designed by the best architect in the industry who also took the time and explained to me the effects of natural light and shadows that will be created as the sun moves over the facility. I really wanted to say Congratulations to you and your staff on such a fine job.

Sincerely,

Denise Schmidt
