

Fort Wayne press project moves ahead

Work progresses with the installation of a TKS (USA) Color Top 7000 4-by-2 press at Fort Wayne (Ind.) Newspaper's new \$35-million production facility in downtown Fort Wayne. FWN, which prints the News-Sentinel, Journal Gazette and Sunday Journal Gazette, expects to go on-edition with the machine in August. The press is configured as six 4-over-4 towers, eight reels, 48 couples and two 2:5:5 folders. Advanced Industrial Services is rigging the press. Dario Designs Inc. designed the building, which won accolades from the city's Downtown Improvement District.
