Dear Dario:

I wanted to express my gratitude for your fine work in designing our new production facility. Your expertise was invaluable in developing a design that met our production flow requirements. We appreciated the timeliness of your input and the fact that you and your staff went above and beyond the call of duty to help us iron out difficulties as the project unfolded.

We were proud to put our plant and new KBA Comet press into operation on schedule and on budget. Your fine work and timely advice certainly helped us in that regard.

I would be happy to recommend your services to other newspapers.

Warm personal regards,

Rufus Woods
